WE VALUE CURIOSITY

To us, curiosity means being open to new possibilities. Curiosity leads to innovation, positive changes and increased expertise. Working with us is fun because we make things happen.

SUSTAINABLE VALUE CHAIN

At ECL Projekt AS, we take environmental responsibility seriously. As a certified Eco-Lighthouse company, we continuously work to reduce our environmental footprint at every stage.

We make conscious material choices, use energy-efficient solutions, and ensure responsible waste management. We follow the UN's Sustainable Development Goals, with a primary focus on number 12, 13 and 14:

- **Responsible Consumption and Production (12):** We choose quality materials with long lifespans and reuse existing shopfittings where possible. Our FSC-certified factory in Sweden ensures sustainable forestry practices.
- **Climate Action (13):** We reduce emissions through energy-efficient production methods, optimized logistics, and waste sorting. Our goal is to recycle at least 80 % of the materials we use.
- **Life Below Water (14):** Through Fjord CleanUP, we actively participate in removing plastic and waste from the Oslofjord, supporting cleaner marine environments.

We require suppliers to reduce environmental impact and meet our standards.
