

NORSE CUTTING

On-site machining & Decommissioning specialist

**Specialist in decommissioning &
mobile- and on-site machining**

- Onshore
- Offshore
- Above water
- Subsea

Local client relations on a global scale

Norse Cutting is a group of professionals operating globally. Our highly skilled crew boasts a broad range of experience within our disciplines – as well as an extensive track record for inventing and engineering new tools for better and safer operations.

Engineering

We offer project management, planning, R&D, modification of existing equipment and manufacturing of new tools and products.

This is Norse Cutting

- Norwegian company established in 2015
- Experts in on-site machining, cold cutting and decommissioning
- Operates on- and offshore, above water and subsea
- Core team comprises of 50+ employees
- HSE and Quality is our main focus to ensure safe and efficient operations for our clients

On-site machining

– optimal uptime performance

Norse Cutting's on-site machining services consist of standard machining of flanges, as well as all types of mobile machining tasks, we like challenges and finding the best solutions for our customers.

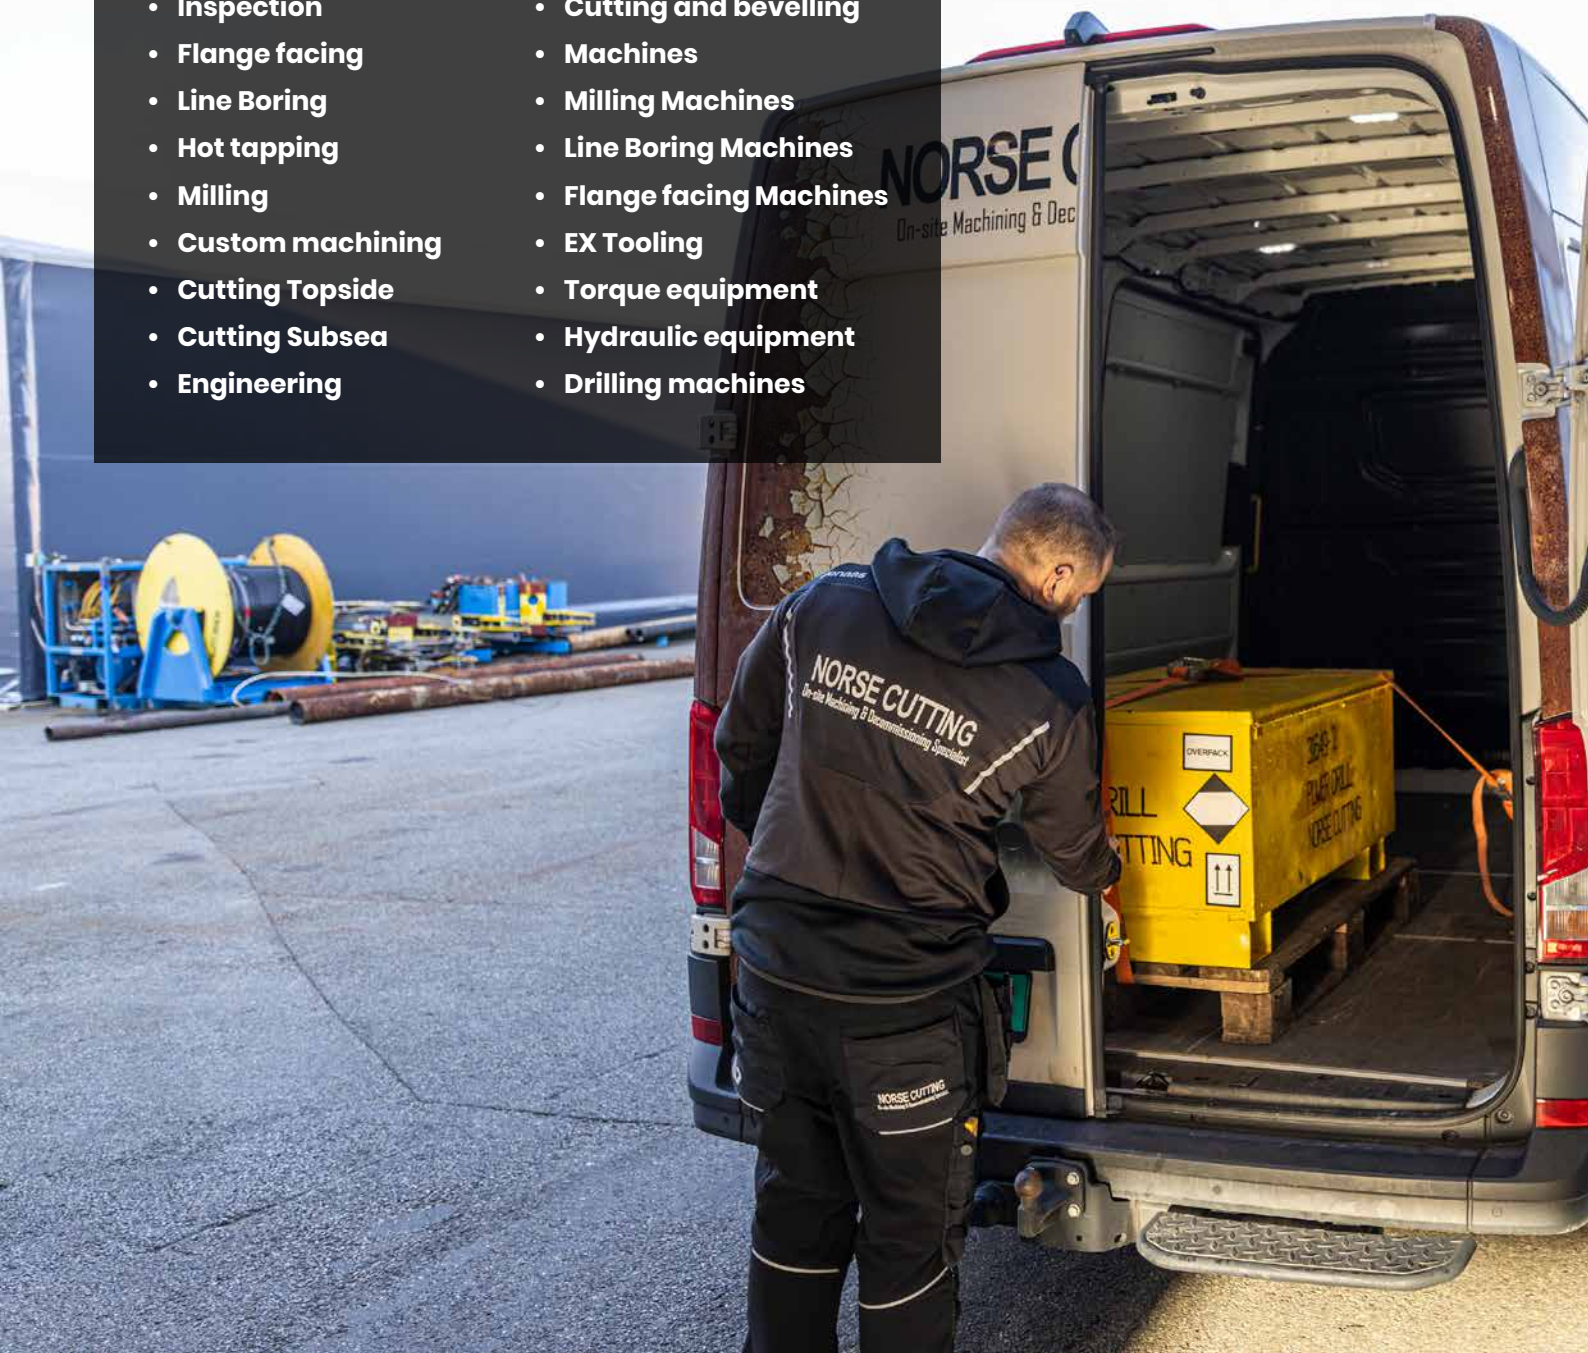

Our services

- Inspection
- Flange facing
- Line Boring
- Hot tapping
- Milling
- Custom machining
- Cutting Topside
- Cutting Subsea
- Engineering

Our products

- Cutting and bevelling
- Machines
- Milling Machines
- Line Boring Machines
- Flange facing Machines
- EX Tooling
- Torque equipment
- Hydraulic equipment
- Drilling machines

Our machines

Custom engineered machines for challenging operations.

Subsea design and manufacturing

- Inventive solutions for short time deliveries

Norse Cutting is always looking for the best solutions for our customers whether it is above or below water. We have extensive experience in cutting and machining in our area, whether it is standard or special projects.

• Diamond Wire cutting

- Cuts all sizes and can be routed into restricted spaces
- ATEX certification
- Easy to install
- Hydraulic operation
- Subsea and topside

• Mechanical Cutting and Machining

- Cutting and beveling
- All types of machine sizes for cutting and beveling of pipes – diver operated
- Custom design for individual projects on request for ROV use
- Cutting and bevelling machines
- Guillotine saws
- Hydraulic shears
- Cable cutting
- Chain cutting
- Travel Cutters
- ROV Grinders

Rental services

Norse Cutting AS has a large amount of rental machines available listed below. Did you know that we have Travel Cutters for sale and rent? Choose between pneumatic or hydraulic.

- Mechanical cutting & beveling machines
- Guillotine saws
- All types of flange facers
- Diamond Wire cutting equipment
- Subsea Diamond Wire saws
- Subsea Grinders
- Portable Drilling machines
- Line boring equipment
