Skipsteknisk  ®

# History

## Skipsteknisk AS was founded in 1976

The company's location in Aalesund, Norway's leading fishing port, made it natural to focus on fishing vessels and fishermen's need for maritime services relating to ship design and ship management. During the 1980s the company established itself as a key player in the modernisation of the fishing fleet operating in the rough and harsh conditions of the North Atlantic.

The design of innovative and modern fishing vessels for fishermen around the world is still one of Skipsteknisk's key business areas.

During the 1990s, the company expanded its operation through designing research, including fisheries, oceanographic, hydrography and seismic research. Skipsteknisk has designed research vessels for research institutes all over the world, and today it is recognized as a leading ship designer in the field.

During the late 1990s and early 2000s Skipsteknisk entered into the market of specialised and advanced offshore service vessels and have since designed many of the World's leading vessels within offshore construction, diving support, platform supply and survey.

Today Skipsteknisk can offer it's clients a wide range of specialised vessel designs including wind farm service vessels, live fish carriers, coastguard and patrol vessels.

Skipsteknisk's head office in Aalesund is located within one of the World-leading maritime clusters of ship owners, shipyards, ship designers and ship equipment manufacturers. The region is appointed Global Centre of Expertise – Maritime.

ST Group consists also of electrical service company Skan-El AS, an engineering office in Turkey and a branch office in China.

## Independent Ship Design and Consultancy

As an independent ship designer Skipsteknisk is able to offer its Clients consultancy and design services purely on the basis of quality, fitness for the purpose, service availability and value for money.

Our ST-designs are built at qualified shipyards in all parts of the World, equipped with the latest developments within ship equipment and system technology.

”

**Each new ST-design enhances Skipsteknisk's worldwide reputation as an independent, experienced, reliable and innovative ship design consultant**

# Specialists in design of highly advanced ships

Through our independency our dedicated and experienced ship designers have freedom to create the most innovative and future-oriented ships.

Our design philosophy is to create sustainable ships for a specific purpose with the most suitable equipment, the best

possible performance, the lowest possible emissions, the highest levels of safety and with an elegant appearance.

Our designers are using the latest available tools within 3D- design, visualisation, performance calculations and verification.

## Our services

We offer our Clients a full range of services related to newbuilding processes, covering;

- General consultancy
- Design development
- Concept studies
- Tender documentation, preparations and execution of tenders
- Assistance during contract negotiation
- Basic/Class design
- Detailed design
- Building supervision and inspections

## About us

### Our Vision

Be the leading ship designer within our segments, that through skilled and dedicated people creates the best and most functional and sustainable ship designs.

### Our Mission

Offer independent high standard ship design and consultancy services within our segments.

### Our Values

- Dedicated
- Trust-worthy
- Respectful
- Competent

## Our design range

### ST-100 FISHING VESSELS

- Factory Freezer Trawlers
- Pelagic Trawlers & Purseseiners
- Longliners
- Crab Catchers

### ST-200 OFFSHORE SERVICE VESSELS

- Offshore Construction Vessels
- Platform Supply Vessels
- Diving Support Vessels
- Cable Laying Vessels
- Anchor Handling Vessels

### ST-300 RESEARCH VESSELS

- Fishery and Oceanographic Research Vessels
- Seismic Research Vessels
- Polar Research and Support Vessels
- Expedition Vessels

ST-400  
RENEWABLE & WINDFARM VESSELS

- Service Operation Vessels
- Windfarm Turbine Feeder Vessels
- Infield Windfarm Cable Layers

ST-500  
AQUACULTURE

- Live Fish Carriers
- Production Vessels

ST-600  
COASTGUARD AND PATROL VESSELS

- Coastal and Offshore Patrol Vessels
- Fishery Protection Vessels

# Specialists in design of highly advanced ships

We are working for professionals; global shipowners worldwide who are innovators in their fields, and we design specialized vessels with emphasis on Fisheries, Offshore Service, Research, Windfarm, Fish Farming and Coastguard and Patrol Vessels.
